DETAILED ACTION

Drawings

1. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach in combination as claimed an electrical leakage detection apparatus that compares a signal's amplitude level to a predetermined threshold value through a low pass filter that allows signals set variably to a frequency to pass in a signal generator and detects the presence or absence of electrical leaks between a high-voltage circuit and a low-voltage circuit. A control unit sets the signal frequency of the signal generator and the cut-off frequency of the low pass filter after start up low-voltage circuit and before startup of the

high-voltage circuit to be higher than those after startup of the high-voltage circuit. Leakage can be detected without being influenced by various kinds of noise.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter Benson whose telephone number is (571) 272-2227. The examiner can normally be reached on Mon to Fri 6:30 AM to 4:00 PM.
